MAINETIRE

PNEUMATICS

DEFENDER

This super service industrial pneumatic is tough, cut-resistant, and provides essential flotation on unpaved surfaces. The wide, square profile and massive lugs offer excellent traction. The self-cleaning industrial tread, rugged all nylon cord body, and thick, flat scuff-bars also contribute greatly to the high efficiency of the Defender.

APPLICATION: *Wherever a truly rugged industrial pneumatic is required.*

AirTrac The AirTrac offers the following special group of features:

- Extra **tough construction** for superior puncture resistance.
- High **natural rubber** content for soft riding resilience and high load capability.
- Deep **traction** lugs.
- Strong nylon cording and high fabric lock-up around bead wires for **sidewall stability**.

APPLICATION: *The "value priced" alternative when extra duty service is needed.*

INDUSTRIAL DEEP LUG

The industrial pneumatic designed for extended use on smooth floors and runways. A center running bar anchors the lugs together for increased protection from cracking, tearing and casing penetration. Straight, smooth sidewalls resist scuffing and snagging in confined areas.

APPLICATION: *General smooth-surface plant, yard and warehouse operations.*

MAINETIRE

POLYURETHANE PRESS-ONS

PERMATHANE & PERMA-EIGHTY

Permthane and Perma-eighty polyurethane press-on tires are the undisputed load capacity champions for the most severe applications imaginable. Both are non-marking and offer superior resistance to abrasion, cutting, chunking and chemicals. In addition, they greatly extend battery life on electric trucks.

Perma-eighty (85 durometer) is softer riding than the more rigid **Permthane** (94 durometer).

APPLICATION: *Wherever particularly difficult load conditions prevail.*

Please consult your MAINETIRE Dealer for specific compound and tread design compatibilities.
